

March 24, 1980

LB 998

the committee but what the committee is doing is reflecting what the transfer by the Governor...or the designation by the Governor for the agency to have responsibility of those funds, which under federal law is his prerogative.

SENATOR KREMER: But the Governor did not discuss this with the committee?

SENATOR WARNER: Pardon?

SENATOR KREMER: The Governor did not discuss this....

SENATOR WARNER: We had a letter from the....from Mr. Luenberger where they requested that the funds be transferred to the Department of Environmental Control. The letter also requested that the personal services limitations for the Natural Resource Commission be expanded, and that....so that those three individuals could be...that are now in the department of Natural Resource Commission could stay in that agency and be assigned to water planning. The committee did not go along with that portion of the Governor's request, but rather we went with the route of transferring both the funds and the people to the Department of Environmental Control. So we only partially did what the Governor suggested.

SENATOR KREMER: Okay, thank you.

SPEAKER MARVEL: Okay, the motion now is the adoption of the Appropriation Committee amendments to LB 998. All those in favor of that motion vote aye, opposed no. Record the vote.
